Career Profile

Total 12.3+ years of experience in software
▪Having 10.5 year of Java-J2EE development Experience.
▪2 Years of experience in Cerner (HealthCare) tool for NHS UK project.
▪Experience in MVC based technologies Spring MVC, Struts.
▪Experience in JSF and Prime faces for UI development.
▪Experience in Persistence technologies Hibernate and Ibatis.
▪Working exposure in agile methodologies
▪Having experience in **Cards and Payment** industry**, Healthcare** service industry, **Telecom** service industry,
Geographical Information System and **E-governance** projects, **Storage** domain.

Technical Skills

Skill set	Details
Technologies	Java,J2EE
Spring Frameworks	Core, MVC, Web-flow, JPA, Security, REST, Spring Boot, Theme leaf.
Spring Cloud Netflix	Micro services, Netflix Zuul, Netflix Ribbon, Eureka Discovery Services, Rest Template and Feign Client.
UI Framework	Struts, JSF, Prime Faces.
Middleware	Hibernate 3.0,Ibatis
Java API	Servlet, JSP.
API	REST Web Services
Testing Framework	Junit
Servers	Tomcat, JBoss, Web Logic.
Database	Oracle, Sql Server, PostgreSQL.
IDE	Eclipse.
Search Engine	Solr.
Build Script	Ant, Maven.
Continuous Integration	Jenkins.
Code Quality	Sonar Lint.
Reporting	Jasper Reporting.
Repository	GIT, SVN, Clear Case, Team Foundation Server.
Issue Tracking Tool	JIRA, ALM.

Employment Profile

- 1#from OCT 2016 – Till
  Working as an Associate Tech Specialist in Tech Mahindra, Pune using Java-J2EE Technologies

- 2#from May 2013 – OCT 2016
- Worked as a System Analyst in Atos India, Pune using Java-J2EE Technologies

- 3#from Feb 2013 – May 2013
- Worked as an Application Analyst in Syntel LTD, Pune using JAVA-J2EE technologies.

- 4#from July 2010 – Jan 2013
- Working as a Software Engineer in Wipro Technologies, Kolkata using JAVA-J2EE technologies.

- 5#from March 2010 – July 2010
- Worked as an Application Programmer in Web Spiders India PVT Ltd, Kolkata using JAVA-J2EE technologies
- 6#from March 2007 – March 2010
- Worked as Software Developer in Allen Industries Ltd, Kolkata using JAVA-J2EE technologies.

Projects in Detail

Project Domain	Telecom Domain
Project Name:	CSS-NG
Client	AT&T
Technologies	Java 8 JSP Struts Spring Core Spring Security Hibernate ,JMS,REST,Maven Oracale tomcat.
Role	Team Lead
Location	**Tech Mahindra Pune**
Duration	**Jan 2019- Present**
Team Size	12

Various application use CSS NG for retrieving information like site details site assets.l location ,ticketing etc.

Project Domain	Card Domain
Project Name:	LIB Batch Driver
Client	MasterCard
Technologies	Java, Spring boot and Spring REST
Role	*Senior Developer* Requirement Analysis, Designing and Coding
Location	**MasterCard Client side**
Duration	**Jan 2018-Nov 2018**
Team Size	3

Description: The Batch Driver is a Spring Boot application that exposes a collection of JSON services for interacting with the Linux Box. The easiest way to interact with the Batch Driver is through a HTTP client program that is capable of generating the HTTP verbs (GET, PUT, POST) and able to provide message payloads.
The **Batch Driver** process is a Spring Boot program that enables testing tools the ability to interact with the Linux server and Batch process to facilitate testing.

Project Domain	Card Domain
Project Name:	MPTS
Client	MasterCard
Technologies	Java,JSP,STRUTS,SPRING,Ibatis
Role	*Senior Developer* Requirement Analysis, Designing and Coding
Location	Client side
Duration	Nov 2016 –Dec 2017.
Team Size	10

Description:
CSR Portal-Customer Service Representative Portal.
This application allows users to set up various parameters related to card issuance. The Institution and operation users can:
Configure business products offered by institutions. Configure account/wallet parameters for cardholders.
Agent Portal
This portal will help you process cardholder requests and transactions. You can also access and share cardholder information to assist them with their queries and serve customers better.
Card Holder Portal
This portal help the user to see their transaction and details.

Project Domain	Geographical
Project Name:	LGR- Landelijk Grondwater Register

Client	Netherland Public Affairs
Technologies	Spring MVC, Spring Security, Spring Web Flow, Spring JPA, Thyme leaf.
Role	Senior Developer Requirement Analysis, Designing and Coding
Organization	ATOS India Pvt
Location	Pune
Duration	OCT 2015 – OCT 2016
Team Size	3

Description

This is the project for Landelijk Grondwater Register (LGR) means National Groundwater Register of Netherland. The LGR is a national registration of all land and water licensing notifications for groundwater extraction, infiltrations and open geothermal energy systems in the Netherlands. The main task of this application is based on water consumption it creates invoice and billing and sends to the customers. The LGR is used to support the processes licensing, maintenance and taxes by provinces, water boards and municipalities.

Project Domain	Geographical
Project Name:	Risicokaart
Client	Netherland Public Affairs
Technologies	Java, Struts, JSP, Open Layer, Geo Server.
Role	Senior Developer Requirement Analysis, Designing and Coding
Organization	ATOS India Pvt
Location	Pune
Duration	OCT 2015 – March 2016
Team Size	4

Description -

Risicokaart.nl allows you to discover the risks in your area by entering your post code or place of residence. You can see whether there is an increased risk in your area of, for instance, an aviation accident, natural fires or floods and you receive advice about what you must do in such a case.

The Netherland government is obliged to provide information about possible risks. You will therefore be able to read precisely what the risks are, what dangers they represent and how to protect yourself in an emergency.

Precautionary measures ensure that the risk of a large disaster actually occurring is exceedingly small. The extent of a certain risk cannot be indicated in advance. For instance, if a toxic gas is released, the danger zone will depend on the weather. After all, wind blows the toxic substances in a certain direction. That is why the experts are cautious when estimating the danger zone.

Project Domain	E-Governance
Project Name:	**Pacta2**
Client	**Ministry of Foreign Affairs Netherland**
Technologies	Java, Prime Faces, Hibernate, Alfresco (DMS), Solr and Jasper Reporting
Role	Senior Developer Requirement Analysis, Designing and Coding
